

Guide to Proportionate Giving

Instructions: Simply look down the first two columns to find your annual or weekly income. Then look across the row to determine your giving level in percent. We encourage each household to increase giving 1% per year.

Example: For a household earning \$52,000 per year and contributing about \$30 per week, the contribution is about 3% of income. This is a portion of what has been given by God to be managed and then is returned to do ministry. This is a 3% response. A 1% increase (from 3% to 4%) would be about an additional \$10 per week.
